

AJAY CHAUDHARI

+91-9569817365 ajaychaudhari2c@gmail.com Ajay Chaudhari Leetcode.com/Ajay

Technical Skills

Programming Languages: Java, C++, SQL

Backend: Spring, Springboot, Hibernate, Microservices, REST APIs

Architecture & Design: Design patterns, SOLID Principles, Hexagonal Architectures

Databases & Caching: MySQL, MongoDB, Redis

Cloud: Red Hat Openshift(OCP), Docker, Kubernetes, Jenkins, Git, GitHub

Miscellaneous: CI/CD, Low Level Design, High Level Design, Kafka, Data Structure And Algorithm

Experience

Tata Consultancy Services

November 2023 – Present

Software Engineer(Backend)

Java, Spring Boot, Microservice, Postman, Git, Rubrik, MYSQL

- **Developed** critical functionalities for a high-availability **Payment Module** serving **5M+** subscribers for the **Hala Prepaid product**, ensuring system reliability and scalability.
- **Mentored and on-boarded 3+** new team members on **payment domain** logic and development best practices, accelerating **team productivity** and ensuring **high-quality** deliverables.
- Performed comprehensive **pre and post-scripts** using **MS-SQL**, validating critical **server operations**, decreased production **incidents by 35%**.
- **Constructed 8+ RESTful APIs**, including **Recharge Voucher** and **Get Balance**, using Spring Boot and microservices, cutting **API response times by 25%** in the **Middle East region**.

TwoWaits

August 22 – November 22

DSA Scholar Intern

Data Structure and Algorithm, C++

- Crafted and curated a series of **data structures and algorithm** questions at medium to advanced levels, resulting in a highly engaging contest that attracted **200+ participants** and facilitated continuous learning and growth in the field.

Projects

E-WALLET SERVICE | Backend MicroService </>GitHub

- **Created** a scalable **E-wallet application** microservice, providing a secure **payment interface** and real-time event-driven **notifications** using **Apache Kafka**.
- The e-wallet project includes four modules: **User service**, **Transaction service**, **Notification service**, and **Wallet service**.
- Developed **microservice architecture** using Spring Boot and Java, optimizing backend functionality and **reducing response time by 40%**.

Tech Stack: Java, Spring Boot, MySQL, Redis, Hibernate, Microservice Architecture.

HOTEL BOOKING APP | Backend MicroService </>GitHub

- Designed and executed user registration and login, enabling users to **search room availability by date and make bookings**.
- Implemented full **CRUD functionality** for booking management, allowing users to **create, view**, and **cancel bookings** with unique confirmation codes and providing admins with a management interface.
- Build role-specific **APIs for admin** and normal user respectively and added **JWT authentication** for securing APIs.

Tech Stack: Java, Spring Boot, MySQL, Hibernate, ReactJS, Spring Security, Postman.

Achievements

- Secured AIR 1586 out of 200K+ in GeeksforGeeks Job-A-Thon 2023.
- Awarded TCSAI Spark at National Hackathon 2025 for AI solution (top 20 of 100+).

EDUCATION

Gautam Buddha Universtiy

JUNE 2019– JUNE 2023

Bachelor of Technology in Computer Science Engineering

8.2 CGPA
