

ADITYA BIRLA

+917441176988 aditya.dev0204@gmail.com

Technical Skills

Languages: Java, Python, SQL
Frameworks & APIs: Spring Boot, Scikit-Learn, Flask, Hibernate, Microservices, REST APIs
Databases & Caching: MySQL, OracleDB, Redis
DevOps & Tools: Docker, Jenkins, Maven, Git, GitHub, Postman, JUnit, Tomcat
Cloud: AWS
Familiar with: Apache Kafka, MongoDB, Kubernetes, GitHub Copilot
IDEs / OS: Eclipse, STS, VS Code, Windows

Experience

Freelance Software Developer

2024 – Present

Full Stack Developer (Spring Boot + React)

Remote, India

- Designed and developed a full-stack web application for a tattoo studio, featuring a service catalog, artist portfolio showcase, and appointment booking flow, built the backend using Spring Boot with RESTful APIs and the frontend using React.js.
- Developed dynamic content management APIs enabling real-time updates to gallery images, pricing, and service listings without redeployment.
- Implemented a pre-launch e-commerce platform for a food products brand (Rama Foods), including a product catalog, lead capture (launch notification) system, and contact module backend powered by Spring Boot and frontend in React.js.
- Built RESTful APIs for product listing management, user notification registration, and inquiry handling with Oracle as the primary datastore.
- Ensured mobile-responsive UI across both projects and optimized API response times for better user experience.
- Managed end-to-end delivery from requirement gathering and system design to deployment for both projects independently.

Denave India Pvt Ltd

January 2024 – April 2024

Junior Java Developer

Noida, Uttar Pradesh

- Developed the Assessment module for the Intelligent Salesforce Automation product using Spring Boot.
- Created backend logic to display dynamic sets of questions on the UI.
- Developed APIs to capture user responses from the UI and store them in the database.
- Built an API to calculate user scores based on their responses and control access to subsequent levels of questions.
- Implemented restrictions to block users from accessing higher-level questions if they failed to meet the required score.
- Utilized Jenkins for deploying these modules in the development environment, ensuring smooth integration and continuous testing.

Exposys Data Labs

June 2023 – July 2023

Software Developer Intern

Remote, India

- Developed a web application to secure user data submitted on the form page using cryptographic algorithms to prevent unauthorized decryption.
- Added client-side validation for form components using JavaScript to ensure data integrity.
- Developed the backend using Spring Boot, incorporating authentication logic to restrict access to encrypted data.

Projects

ResumeRank AI | *Python, Scikit-learn, TF-IDF, Cosine Similarity, Flask, REST APIs, NLP*

- Designed a skill extraction module to identify and compare key technical skills from resumes and job descriptions.
- Applied Natural Language Processing techniques to solve real-world HR analytics problems.
- Demonstrated end-to-end pipeline from data input, processing, model execution, to insight generation.

Education

IES IPS ACADEMY

Aug. 2019 – May 2023

Bachelor of Technology in Electronics and Communication

Indore, Madhya Pradesh
