Professional Summary

- Backend Java Developer with **2.2 years of experience** in analysis, design, development, and deployment of scalable software applications using **Java/J2EE, Spring Boot, REST APIs, and Microservices**.
- Experienced in building both **monolithic and microservices architectures**, implementing **event-driven solutions with Apache Kafka**, and managing **CI/CD pipelines using Jenkins** with strong analytical and problem-solving skills to deliver reliable, maintainable systems.

Technical Skills

Languages: Java (Java 8)

Frameworks & APIs: Spring Boot, Hibernate, Microservices, REST APIs

Databases & Caching: MySQL, OracleDB, Redis

DevOps & Tools: Docker, Jenkins, Maven, Git, GitHub, Postman, JUnit, Tomcat

Cloud: AWS

Familiar with: Apache Kafka, MongoDB, Kubernetes, GitHub Copilot

IDEs / OS: Eclipse, STS, Windows

Experience

Nexvia Software Technologies

May 2024 – Feb 2026

Software Engineer (Java Backend)

Java, Spring Boot, Microservices, Postman, Git, AWS, OracleDB

- Developed a full-stack eCommerce platform enabling users to browse **products, manage shopping carts, place orders, make payments** and receive **order notifications**. The system supports product listing, secure checkout, payment gateway integration, and real-time order status updates.
- Implemented multi-channel notification features by integrating **JavaMail API** for automated customer email alerts and **WATI WhatsApp services** for real-time order and payment notifications, improving user engagement and communication reliability.
- Improved code quality and delivery efficiency by writing comprehensive **unit tests using JUnit and Mockito**, while actively following **Agile Scrum practices** and maintaining version control workflows through **Git**.
- Utilized **AWS EC2** for application hosting and **S3** for secure object storage, improving system scalability, availability, and deployment flexibility.

Denave India Pvt. Ltd.

Jan 2024 – Apr 2024

Junior Java Developer

Java, Spring Boot, Microservices, SQL Server, AWS, Jenkins

- Worked on the **Intelligent Salesforce Automation (ISFA)** product to streamline and optimize enterprise sales operations and productivity tracking.
- Developed the **Assessment Module** using **Spring Boot**, enabling dynamic question rendering and configurable evaluation workflows.
- Designed and implemented secure **RESTful APIs** to capture user responses, persist data in relational databases, and ensure data integrity.
- Built **scoring and access-control logic** to regulate progression to higher-level assessments based on performance thresholds.
- Resolved cross-module defects, collaborated with QA and frontend teams, and supported smooth **CI/CD deployments using Jenkins**.

Education

IES IPS Academy

Aug 2019 – May 2023

B.Tech in Electronics and Communication

Indore, Madhya Pradesh
